

CHESTNUT HILL SOUND WINS BEST OF SHOW AT MACWORLD

GEORGE™ DIGITAL AUDIO SYSTEM FOR THE IPOD® DEBUTS

MACWORLD, SAN FRANCISCO, January 12, 2007 – Chestnut Hill Sound Inc., the manufacturer of the GEORGE digital audio system for the iPod, was honored with a Best of Show Award from the editors of Macworld during the Macworld Expo & Conference. GEORGE was the only product in the iPod audio system market honored with an award at the 2007 Expo.

The Macworld Best of Show Awards is presented each year at the Macworld Conference & Expo to the best products making their debut at the annual trade show. Macworld editors roam the Macworld Expo show floor, searching for the best hardware and software debuting at the annual Mac trade event. From a crowded field, the editors selected 11 products, unveiling Best of Show winners at a special presentation.

"We've found a way to share the very best products on display at Macworld Expo with Expo attendees," said Jason Snell, VP/Editorial Director of Macworld. "Our Featured Presentation allowed us to honor the Best of Show winners in public, demonstrating why our editors picked them as the best the Mac world has to offer."

The Macworld Video Podcast [Video Podcast #5](#) features profiles of the winners and some highlights of the presentation, hosted by Editorial Director Jason Snell and News Director Jim Dalrymple.

"We are delighted to have our first product, GEORGE honored as Best of Show by the editors of Macworld," said Steve Krampf, CEO of Chestnut Hill Sound. "The iPod has completely changed how you listen to music and GEORGE represents a better way to experience your iPod at home by giving you full control over your music from your place of comfort. CHS is committed to creating digital sound innovations that define next-generation home audio."

About GEORGE

GEORGE extends the famed iPod navigation with the industry's only wireless remote that fully controls iPod functions. GEORGE includes a high quality AM/FM radio that features the market's only patent pending BANDLESS™ tuner and a multi-alarm clock system. GEORGE offers consumers the first digital audio system architected for field upgrades for future digital audio sources. The company also announced its first module: a consumer-installable, no

subscription HD radio tuner licensed form iBiquity which will be available in 2H 2007.

Chestnut Hill Sound developed GEORGE specifically to work with the iPod and it has been certified to meet Apple performance standards. GEORGE is available for purchase online at www.chillsound.com and available later this year at select retail stores for \$549 and \$599 MSRP with a remote charging stand.
